Liquid Levers Innovations CV Joint Circlip Remover

Liquid Levers Innovations Circlip Remover

Saves Time, Money & Bruised Knuckles

CV joint replacement is currently a very tricky procedure which requires 2 pairs of hands and a considerable amount of patience. The part which is at the root of the problem is a circlip which holds the CV Joint in place.

The Liquid Levers Innovations Circlip Remover simplifies this procedure by adjusting to fit the circlip quickly and easily. It then locks in behind the circlip to give a secure grip and leaves your hands free to replace the CV Joint quickly and easily.

The circlip remover from Liquid Levers Innovations has been produced to make removing CV joints a piece of cake. This tiny tool will have a massive impact on the way that you remove CV Joints and it is a must for every tool box.

Liquid Levers Innovations - Solving Problems Through Innovation

Liquid Levers Innovations produce specialist equipment for the vehicle manufacturing and servicing industries across the world. We not only manufacture appliances which are unique and of the highest quality, we actively look at the problems our customers bring to us and come up with new ways of solving them.

Customer care is an essential part of our service. We see the order through from detailed discussion of its application to prompt delivery and customer after-care.

We supply a range of innovative products through distributors in over thirty countries across the world including the US, Australia, Japan, mainland Europe and the UK.
