

Automotive Strut Compressor

Strut components replaced quickly, safely & profitably

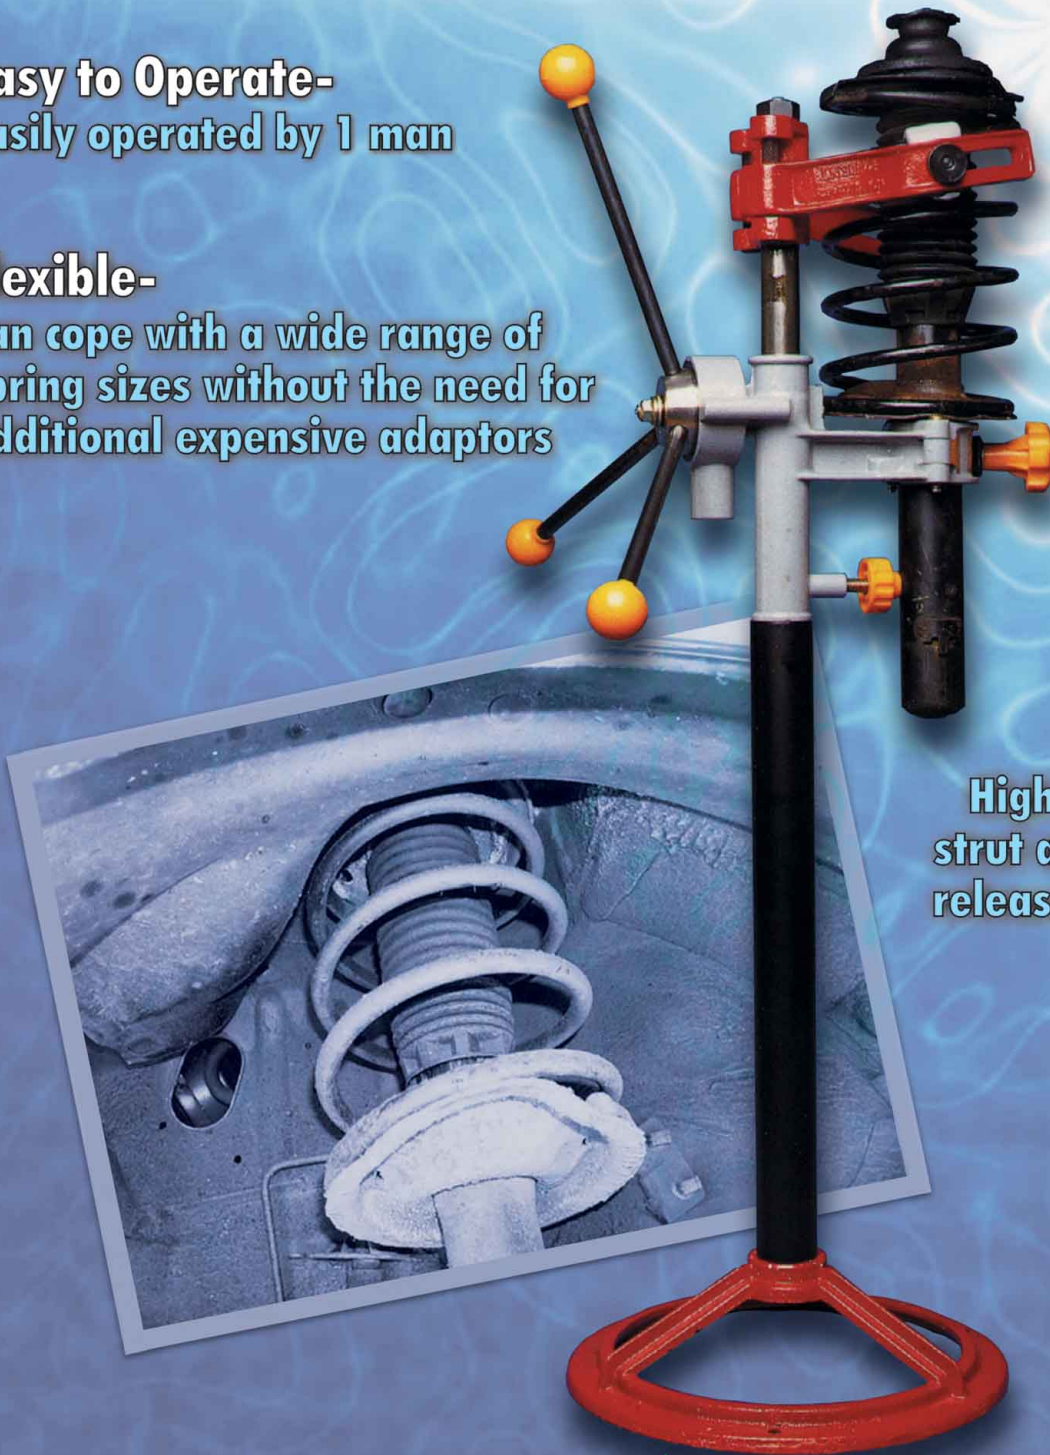

Easy to Operate-
Easily operated by 1 man

Flexible-
Can cope with a wide range of
spring sizes without the need for
additional expensive adaptors

Efficient-
Struts, inserts or
springs can be
replaced in
under 5 minutes

Safe to Operate-
High tensile jaws hold the
strut and spring firmly until
released when the operator
is ready

Strong-
The toughest
Strut Compressor
on the market

LIQUID

INNOVATIONS

Liquid Levers Innovations Strut Compressor

Liquid Levers Innovations Strut Compressor

(Strut components replaced quickly, safely and profitably)

Replacing shock absorbers is potentially very dangerous to both the vehicle and the mechanic since the tensioned coil spring must be compressed to remove the shock absorber. The Liquid Levers Innovations Strut Compressor allows the easy and safe replacement of struts to be completed by one man in less than 5 minutes per strut.

Some Spring Compression methods require the struts to be replaced in situ on the vehicle, however the Liquid Levers Innovations Strut Compressor allows the operation to be carried out away from the vehicle thus simplifying the procedure for the mechanic eliminating the risk of damage to the vehicle.

Typically struts vary in shape and size to fit the range of vehicles on the road today. The flexibility of the Liquid Levers Innovations Strut Compressor allows it to cope with the widest range of spring sizes without the need for extra expensive accessories.

Benefits

Strong - The toughest strut compressor on the market

Simple - Easily operated by 1 man

Efficient - Struts can be replaced in under 5 minutes

Safe - High tensile jaws lock holding the strut and spring firmly until released when the operator is ready

Flexible - Can cope with a wide range of spring sizes without the need for extra expensive parts

Liquid Levers Innovations - Solving Problems Through Innovation

Liquid Levers Innovations produce specialist equipment for the vehicle manufacturing and servicing industries across the world. We not only manufacture appliances which are unique and of the highest quality, we actively look at the problems our customers bring to us and come up with new ways of solving them.

Customer care is an essential part of our service. We see the order through from detailed discussion of its application to prompt delivery and customer after-care.

We supply a range of innovative products through distributors in over thirty countries across the world including the US, Australia, Japan, mainland Europe and the UK.
