"air free" suspension,  
eliminating harshness  
in the vehicle ride**

**Rover approved  
for use in the UK  
and all Rover export  
countries**

**Patented vacuum facility  
allows easy evacuation of  
the system when required**

**LIQUID**  
**LEVERS**  
INNOVATIONS

**Liquid Levers Innovations Hydravac Suspension Pump**

## Hydravac Suspension Pump

**The Liquid Levers Innovations Hydravac Suspension Pump is Rover approved and includes a vacuum or pressure evacuation facility at the flick of a switch. This versatile system enables accurate and efficient testing of hydragas/hydrolastic suspensions in a fraction of the time normally needed. Easily serviced by the user, the vacuum version has all the attributes of the Hydragas Suspension Pump - and more.**

### The Hydravac Suspension Pump Benefits:

- Ensures completely "air-free" suspension, eliminating harshness in the vehicle ride
- Greatly reduces labour costs in renewing suspension/knuckle joints
- The patented vacuum facility allows easy evacuation of the system when required
- It's Rover approved for use in the UK and all Rover export countries

## Liquid Levers Innovations - Solving Problems Through Innovation

Liquid Levers Innovations produce specialist equipment for the vehicle manufacturing and servicing industries across the world. We not only manufacture appliances which are unique and of the highest quality, we actively look at the problems our customers bring to us and come up with new ways of solving them.

Customer care is an essential part of our service. We see the order through from detailed discussion of its application to prompt delivery and customer after-care.

We supply a range of innovative products through distributors in over thirty countries across the world including the US, Australia, Japan, mainland Europe and the UK.
